

## Sandwich-type insulated panel

# Air permeability joints **MFG-GS**

The panels used to build the cold rooms are our exclusive production and are designed for specific use in the refrigeration sector: our panel joints have a 5 times higher thermodynamic efficiency than the continuous products, as demonstrated by the tests performed at the ITC-CNR Institute in Milan.

The complete test reports are available at the headquarters of Cosma Impianti and upon request can be consulted during visits by our sales representatives.

- dry joint panel
- hook joint panel
- foamed joint panel

The **pascal** (symbol: **Pa**) is a measurement unit of the International System, used to measure the pressure: **1 Pa ~ 0,1 Kg/mq**
